Tefik Aliu

Software & web developer

Sweden | Tefik.aliu@gmail.com
tefik-aliu.github.io | github.com/tefik-aliu

I build web applications, APIs and data tools with Python and JavaScript. My independent projects connect browser interfaces, databases, reporting and service tooling, with automated checks for critical behaviour. Open to software and web development roles across applications, data automation and developer tools.

Technical skills demonstrated in projects

Web & applications: Python, FastAPI, JavaScript, HTML, CSS, REST APIs.
Data & services: SQL, SQLite, PostgreSQL, SQLAlchemy, Pandas, OpenPyXL.
Quality & delivery: Pytest, Playwright, TypeScript (browser tests), Git, GitHub Actions, Docker.

Independent development projects

IssuePilot | Web application, access control & data integrity

Issue tracker with a JavaScript interface, FastAPI and SQLite. Search, filters, role-based access and transactional history. Version checks reject stale edits; tests cover concurrent requests, two browser sessions and rollback on storage failure.

Project overview | Source & tests

LinePulse | Interactive dashboard, analytics & reporting

Simulation with a browser dashboard, FastAPI and SQLAlchemy persistence. Synthetic events feed metrics, rule-based alerts and Excel reports. Tests check calculations, API behaviour and user flows.

Project overview | Source & tests

Service Observability Lab | Service reliability & operational tooling

FastAPI job-state API with a JavaScript dashboard. Persistent idempotency supports safe retries without duplicate records; tests cover SQLite and PostgreSQL. Separate health/readiness checks, Prometheus metrics and Docker Compose integration.

Project overview | Source & tests

OpsReportAutomator | Data validation & report automation

Python CLI validates CSV/Excel input, aggregates data by day and department, and generates a four-sheet Excel workbook with charts plus an HTML report. Pandas and OpenPyXL; tests check calculations and generated workbook structure.

Source & tests

Employment experience

Saint-Gobain, Sweden | Glass production & quality operations | 20+ years
Machine operation, quality control and systematic troubleshooting. Diagnosed faults under time pressure and collaborated on practical fixes to support reliable production.

Education & languages

Certified Personnel Specialist (Personalvetare). Additional studies: Administration 1-2; Information & Communication.
Languages: Swedish and Albanian - fluent; English - professional working proficiency.
