

Tefik Aliu

Junior software developer | Python and test automation

Sweden | Tefik.aliu@gmail.com

tefik-aliu.github.io | github.com/tefik-aliu

I am seeking a junior developer role working on backends, web applications and automated tests. I bring over 20 years of glass production and quality experience at Saint-Gobain. That background shapes my interest in troubleshooting, reliable systems and tools that make data useful.

Technical skills

Development: Python, FastAPI, REST APIs, SQL, SQLite, PostgreSQL and JavaScript.

Testing and delivery: Pytest, Playwright, HTTPX, TypeScript for browser tests, Git, GitHub Actions and Docker. Used in the projects below.

Independent development projects

IssuePilot | Backend, permissions and concurrent edits

Built an issue tracker with FastAPI, SQLite and JavaScript. Version checks stop stale updates and deletes. The interface explains conflicts and requires review before retrying. Tests cover concurrent requests, two browser sessions, roles and rollback on storage failure.

Project overview | Source code: [tefik-aliu/issuepilot](#)

LinePulse | Data flows and reports

An independent simulator with synthetic production events, alerts and Excel reports. FastAPI, SQLAlchemy and JavaScript; tests for calculations, API and user flows. A way to practise data processing through questions from my industrial background.

Project overview | Source code: [tefik-aliu/linepulse-industrial-intelligence](#)

Additional projects

Service Observability Lab: a job API with PostgreSQL, Docker Compose, metrics and separate health/readiness checks.

OpsReportAutomator: a Python tool for CSV/Excel validation and report generation with Pandas and OpenPyXL.

Employment experience

Saint-Gobain, Sweden | Glass production and quality operations | 20+ years

Machine operation, quality control and systematic troubleshooting. Diagnosed faults under time pressure and collaborated on practical fixes to support reliable production.

Education and languages

Certified Personnel Specialist (Personalvetare). Additional studies: Administration 1-2; Information & Communication.

Languages: Swedish and Albanian - fluent; English - professional working proficiency.
