

TEFIK ALIU

SOFTWARE ENGINEER | BACKEND, FULL-STACK & AUTOMATION

Sweden | Remote opportunities | Tefik.aliu@gmail.com
tefik-aliu.github.io | github.com/tefik-aliu

I build APIs, web applications and automation systems with persistence, automated tests and deployment tooling. My portfolio connects working software to its architecture, source code and verification. Focus areas include Python, FastAPI, SQL, JavaScript and operational visibility.

ENGINEERING CAPABILITIES

Build: Python, FastAPI, REST, SQL, JavaScript, SQLite, PostgreSQL

Automate: Pandas, OpenPyXL, CLI tools, Playwright, HTTPX

Verify & operate: Pytest, TypeScript browser tests, GitHub Actions, Docker, Prometheus, Grafana, OpenTelemetry and Kubernetes manifests

SELECTED INDEPENDENT SOFTWARE PROJECTS

LinePulse

Built an event simulator, FastAPI backend and browser dashboard that connect synthetic production data to reliability metrics, explainable alerts and Excel reports. Includes SQLAlchemy persistence, health/readiness probes and API, analytics and browser tests.

github.com/tefik-aliu/linepulse-industrial-intelligence

Service Observability Lab

Built a job API with PostgreSQL in Docker Compose, Prometheus metrics, a provisioned Grafana dashboard and optional OTLP tracing. Includes separate health/readiness contracts, Kubernetes deployment definitions and Python/TypeScript quality gates.

github.com/tefik-aliu/service-observability-lab

IssuePilot + independent QA suite

Built a FastAPI/SQLite issue tracker with a JavaScript interface, validated CRUD operations, search and filtering. A separate HTTPX/Playwright suite starts a fresh application in CI and retains failure evidence.

github.com/tefik-aliu/issuepilot

Ops Report Automator

Built a Python CLI that validates CSV/Excel input, aggregates KPIs and generates styled Excel workbooks and HTML reports. Includes data-validation and workbook regression tests.

EMPLOYMENT EXPERIENCE

Saint-Gobain, Sweden | Industrial glass production & quality operations | 20+ years

Machine operation, quality control and systematic troubleshooting. Diagnosed faults under time pressure and collaborated on practical fixes to support reliable production.

EDUCATION & LANGUAGES

Certified Personnel Specialist (Personalvetare), Sweden. Additional studies: Administration 1-2; Information & Communication. Languages: Swedish and Albanian - fluent; English - professional working proficiency.
